Foot Care Resources in Fond du Lac County

Podiatrists (Foot Doctors) The American Diabetes Association recommends people with diabetes have their feet assessed at least once a year by a doctor. A foot doctor can help protect your health by addressing other foot issues like loss of circulation or feeling in your feet, treating foot deformities, etc. Under those circumstances, Medicare and Medicare Advantage plans *may* cover the cost of foot care but copays and deductibles apply. Please talk with your provider about what your plan covers before visiting. Julie Hilbert, Sr. Benefits Specialist, is also a good resource for understanding your coverage under Medicare/Medicare Advantage plans; she can be reached at (920) 929-3521.
