Dear _____ :
(Landowner)

Because of the great hazard to life and property and also cost of repairs from disturbance of utilities by construction or foundation investigation equipment and because the conservation work to be done on land controlled by you may possibly result in disturbing any utilities; before work proceeds, it is your responsibility to do the following:

1. Determine the existence of any buried utilities within the construction area.
2. Notify utility companies of location and kind of work to be done and proposed commencement date. (Pipeline, Telephone, Electric, Etc.)
3. Request that utility owner assist in locating and staking the utility on-site.
4. Request that a utility company employee be present during construction within the utility right of way.
5. Notify the contractor of utility location.
