Public Health
Prevent. Promote. Protect.
**Fond du Lac County
Health Department**

Screening for Appointments

In order to protect your family and our staff we have a series of screening questions to make sure that it is safe for you to come into the clinic or to your appointment:

1. In the past 2 weeks, have you had symptoms of the coronavirus? Symptoms include:
fever (100.4 or higher), chills, cough, shortness of breath, sore throat, runny nose, vomiting, diarrhea, or loss of taste or smell
2. In the past 2 weeks, have you, or anyone in your household, been in close contact with someone who has coronavirus? (*close contact means: within 6ft for 15 minutes collectively*)
3. In the past 2 weeks, have you been contacted by the health department and told to stay home because you have been exposed to coronavirus?

--If **YES** to any of the questions, client may **not** be seen for scheduled appointment. Will need to schedule 14 days after onset or when Health Department clears

--If **NO**: proceed with instructions for appointment

- Remind:
 - Please call us to reschedule if any of your answers to our screening questions change. We will re-ask you these questions again at the time of your appointment and take your temperature at the door prior to your appointment.
 - We ask that you limit the number of people attending your appointment as much as possible. We understand that with small children this is sometimes challenging to accomplish and extra children may need to be in attendance.
 - Ideally adults come alone and only 1 adult for a minor child
 - All participants above the age of 2 will need to wear a mask when attending the appointment. If you do not have a mask one will be provided to you.
 - We recognize that this is sometimes a challenging request for small children and ask that at minimum the masks are worn during close contact- IE: height, weight, blood work.
