

Reclamation Plan Compliance Certification

The general operator of a non-metallic mining site with more than one operator on-site (for example one operator mining, and another operator crushing) may chose to submit a reclamation plan covering all aspects of mining operations on the site. In this case, each additional operator must complete and sign this form. All Reclamation Plan Compliance Certifications shall be submitted with the site's reclamation plan. The site's reclamation plan will not be approved until all operators have submitted the required information.

Company / Operator

Name _____

Address _____

City, State, Zip _____

Phone Number _____
